

ACT-32T UHF Bodypack Transmitter

Features

- Compact and lightweight rugged plastic housing for easy to wear.
- On top of the housing is equipped with an antenna, mute button and mini XLR connector. The Mini XLR audio input connector accepts either a screw-lock or a TA4F quick-lock plug. A remote-control mute jack is for easy activation of the mute function.
- An LCD on the panel displays the working channel, battery status and operating information.
- Powered by two AA alkaline batteries.
- Innovatively designed battery cover allows easy access to operate buttons and prevent accidental operation.
- High/low impedance for microphone or guitar / line inputs. Five selectable gain settings with Auto Limiter to prevent distortion.
- The Mini XLR audio input connector accepts either a screw-lock or a TA4F quick-lock plug.

Specifications

Mic Capsule Modules	Lavalier mic MU-55L or optional other MIPRO's lavalier and headworn mic capsule modules.
Max. Audio Input	0 dBV
Display	Green backlit LCD
Frequency Range	UHF 480 ~ 934 MHz (country dependent)
Bandwidth	24 MHz
Input Impedance Setting	High impedance
RF Power Output	10 mW / 50 mW switchable (country dependent)
Spurious Emission	< 4 nW
Battery	Two AA alkaline
Dimensions	63 × 82 × 22 mm (W×H×D)
Weight	Approx. 86 g
Charging Type	Refer to the actual product in the event of product discrepancy.
