IPCP Pro 555

IP LINK PRO CONTROL PROCESSOR

The Extron IPCP Pro 555 is a versatile, high-performance control processor with a dedicated AV LAN port that is designed to control local AV devices and is secure from outside intrusion or interference. The IPCP Pro 555 features advanced security standards and can be used with multiple TouchLink® Pro touchpanels or eBUS® button panels using a typical network infrastructure. The IPCP Pro 555 is an ideal choice for any application requiring a dedicated, secure AV LAN and support for multiple control signal types.

- ▶ Supports TouchLink® Pro touchpanels and eBUS button panels
- Dual Gigabit Ethernet ports
- Dedicated AV LAN port allows AV devices to be isolated from the corporate network
- Supports secure industry standard communications protocols
- ▶ Supports LinkLicense®
- Six bidirectional RS-232 serial ports with software handshaking
- ▶ Two bidirectional RS-232/RS-422/ RS-485 serial ports with hardware and software handshaking
- ▶ Eight IR/Serial ports for one-way control of external devices
- ▶ Four Flex I/O ports
- ▶ Eight relays for controlling room **functions**
- ▶ eBUS® port for connecting eBUSenabled devices
- DHCP server for AV LAN
- ▶ Supports Ethernet-controllable devices

DESCRIPTION

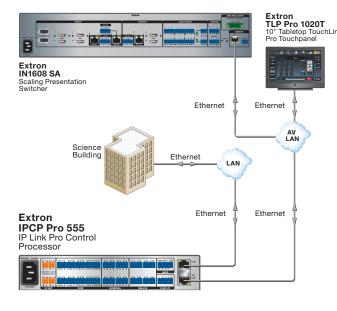

The Extron IPCP Pro 555 is a versatile, high-performance control processor with dual Gigabit Ethernet ports, including a dedicated AV LAN port. The IPCP Pro 555 features a DHCP server for the AV LAN that streamlines system setup and management. The AV LAN port permits communications from the Ethernet port for remote management and firmware updates for Extron devices, and restricts other Ethernet traffic. The IPCP Pro 555 can communicate with multiple TouchLink Pro touchpanels and eBUS button panels. It can also be used with Extron LinkLicense®, which further enhances the capabilities of Extron Pro Series control systems.

The IPCP Pro 555 is configured using Extron Global Configurator® Plus and Professional software, which provides powerful customization options. It is also compatible with GlobalViewer® Enterprise software for complete, centralized AV resource monitoring, management, and control over a computer network.

KEY FEATURES

- Ethernet monitoring and control on each Ethernet port
- AV LAN port allows AV devices to be isolated from the corporate network
- The AV LAN port only permits communications from the Ethernet port for remote management and firmware updates for Extron devices
- Supports popular BMS Building Management Systems protocols
